

TerraGard™ T40

Erosion Control Tablets

STATE-OF THE ART TECHNOLOGY FOR SOIL EROSION CONTROL

Proper use of this product will:

- Minimize or control irrigation-induced soil erosion
- Minimize or control wind-induced soil erosion and dust formation
- Improve water infiltration

DIRECTIONS FOR APPLICATION UNDER FURROW/FLOOD IRRIGATION

Apply TerraGard T40 Tablets:

- In the first irrigation after tillage, seeding or cultivation of the furrow.
- Before the first water enters the furrow.
- At the rate of 1 to 3 tablets per 300 feet of furrow.
- Directly in the water flow at the furrow inflow point.

AgriGator, Inc.

Net Weight - 33 pounds/15 kilograms

Active Ingredient: 40% modified, linear polyacrylamide

TERRAGARD T40 TABLETS HAVE BEEN DETERMINED TO BE NON-HAZARDOUS

CAUTION: Store away from children, pets, livestock, foodstuffs, and water sources. Clean up spills by sweeping or vacuuming before material becomes wet, as wet material is slippery. The addition of soil to wet material stops the slipperiness. Wet soil conditioner washes off hands with copious amounts of water. The addition of gypsum or soil to wet hands or skin will help to remove the soil conditioner. Use this product in accordance with good industrial hygiene safety practices which include:

- Avoid exposure to sprays
- Avoid ingesting product
- Avoid inhalation of dusts/sprays
- Avoid eye and skin exposure

NOT A PLANT FOOD INGREDIENT

Contains a substance known to the State of California to cause cancer in laboratory animals.
